Asana · Jira · Airtable
Google Workspace
MS Teams

PROFILE

Creative director and multidisciplinary maker with 20+ years of experience turning complex ideas into coherent products, experiences and systems. I work across creative, technical and operational disciplines: defining the idea, designing how it works, building the tools behind it, and leading the work through production.

My career spans advertising, post-production, software, cultural work and global industrial markets, with a consistent focus on making complex information useful, legible and reusable.

THE WARD

Founder & Creative Director | 2023–Present

- Conceived and built The Ward from an initial St. Louis neighborhood project into a reusable system combining geographic and civic data, environmental conditions, local places, events and community participation.
- Designed the product architecture, visual system and interaction model, including systems for representing buildings, landscape, weather, time and the civic life of a place.
- Built a reusable neighborhood framework designed to extend across communities rather than rebuilding each place independently.
- Launched the first St. Louis implementations and established the system for expansion to additional neighborhoods and cities.

NORDSON INDUSTRIAL COATING SOLUTIONS

Creative Director, Consultant | 2022–Present | Remote

Embedded creative lead working across Marketing, Product and Engineering for a global industrial technology business.

My work at Nordson has expanded from creative execution into an integrated practice spanning brand systems, product visualization, environmental experience, content production and the tools used to create and deploy that work.

NORDSON INDUSTRIAL COATING SOLUTIONS

Selected Scope

- Built Ascend Studio, an internal creative practice and toolkit for producing and managing high-quality visual content across teams, channels and global markets.
- Created reusable brand and production systems spanning modular assets, prepared media, multilingual publishing and automated workflows.
- Partner with Marketing, Product and Engineering to translate complex industrial technologies into clear product stories, visual systems and launch materials.
- Lead creative development across product visualization, motion, video, digital, print and environmental experience, from concept through production.
- Design the exterior brand environments for major international trade shows, including FABTECH, METPACK, Surface World, PaintExpo and World Battery.
- Coordinate cross-functional teams, outside vendors and specialist partners while maintaining consistency across divisions, products and markets.

PROVINCETOWN BUSINESS GUILD

Creative Operations Manager | 2018–2020 | Provincetown, MA

- Directed creative operations for a destination and cultural organization producing year-round programming and major annual events.
- Built creative and production systems supporting events attracting thousands of visitors.
- Redesigned workflows and automated recurring content and data-entry processes, reducing administrative overhead and repetitive work.

WLVX/DATASCOUT

Founder + CEO | 2013–2022 | New York • Los Angeles • Austin • Provincetown

- Founded and developed an interactive e-commerce video publishing and analytics platform.
- Defined the product concept, roadmap, feature requirements and user experience.
- Wrote specifications and managed feature development across devices.
- Led the business across creative, technical and commercial requirements from concept through deployment.
